## WILDFARMED

*Wildfarmed flour fixes the planet, because they farm differently.*

*By putting soil health first, and paying farmers properly, they are able to grow tasty, highly nutritious food, in a way that heals the planet. Their wheat is grown and milled in the U.K. without the use of chemicals, in a system that prioritises soil health, increasing soil biodiversity, and drawing carbon from the atmosphere, and producing a nutrient-dense pizza.*
